## **Get the most from your call**

### **Focus**

Call when you won't be distracted. You will get the most out of the call if the TV is turned off and the children are safely somewhere else so you can focus.

### **Allow enough time**

Your Intake Specialist will give you as much time as your problem requires.

### **Avoid calling from a cell phone, if possible**

If you are cut off, you may have to answer the same questions again.

### **Have your documents in front of you**

Your Intake Specialist cannot give you guidance without complete information.

### **Have a pen and paper handy when you call**

Your Intake Specialist may give you instructions over the telephone. It's a good idea to be able to jot down reminders as you go.

### **Ask questions and repeat instructions**

Don't hesitate to ask questions and repeat instructions so you will know what to do later.

### **Follow instructions**

Your Intake Specialist may explain how to do something.

- If you don't follow the instructions as given, it isn't likely that you will get the outcome you desire.

You may not get the outcome you want.

- Sometimes services are limited, even when help is greatly needed.
- Your Intake Specialist wants to help and will do his or her best to offer options.

► *Please be sensitive and respectful if the services in your unique situation might be limited.*
